

# Fitting & Care Instructions

Instructions on putting on brace:

**Model: DCT-0901**

Step 1: Center brace on side of knee and feed strap 1 through the D-Ring and tighten. If strap is too long refer to reverse side of this instruction sheet

Step 2: Feed strap 2 through the D-Ring and tighten. If strap is too long refer to reverse side of this instruction sheet

Step 3: Feed strap 3 through the D-Ring and tighten. If strap is too long refer to reverse side of this instruction sheet

Step 4: Feed strap 4 through the D-Ring and tighten. If strap is too long refer to reverse side of this instruction sheet

Step 5: Once all straps are tightened, use provided wrench to turn dial counter clockwise. Do small 1/4 inch turns and walk to check relief. Repeat until the preferred amount of unload is reached

Step 6: After initial fitting there are quick release snaps for easy removal and application on subsequent uses.

***See reverse side for strap fitting***

## CARE INSTRUCTIONS

**Hand wash with mild detergent and air dry.**

## WARRANTY

**The DCT-0901 is covered by a 6 month warranty against all mechanical or manufacturer defects, from the date of purchase.**

## Strap Adjustment Instructions:

### Option 1:

Step 1: After initial fitting if any of the straps were too long, lay the brace out open on a table

Step 2: Locate the straps that were initially too long. On the inside you can adjust the length of the strap

Step 3: Adjust the strap length by pulling the strap toward the middle.

### Option 2:

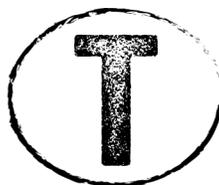

Step 1: At the end of the strap that is too long is a numbered tab. Detach that tab from the strap

Step 2: Cut off the extra strap not needed.

Step 3: Reattach the numbered tab to the cut strap.
